Missing Qty/Price Count

50

Note: **Crackers Family Pack (PRD-2004)** is excluded here despite being a likely low-stock risk. Its inventory record has an unresolved duplicate (two conflicting stock_on_hand values: 40 vs 58). This model conservatively takes the higher value (58, above the reorder level of 50), so it doesn't trigger this alert — but if the true figure is 40, it should. Flagged for the client to confirm before this list is used for restocking decisions.
